System 3000

Blind timer and timer BT

Blind timer and timer BT
Order no.: 5367 ..

Operating instructions

1 Safety instructions

Electrical devices may only be mounted and connected by electrically skilled persons.

Serious injuries, fire or property damage possible. Please read and follow manual fully.

Danger of electric shock. Always disconnect before carrying out work on the device or load. In so doing, take all the circuit breakers into account, which support dangerous voltages to the device and or load.

These instructions are an integral part of the product, and must remain with the end customer.

2 Device components

![Diagram of device components]

(1) Insert
(2) Cover frame
(3) Insert operation button
   \(\uparrow\) = Blind/shutter up / light on, brighter
   \(\downarrow\) = Blind/shutter down / light off, darker
(4) Function button
   \(\bigodot\) = Disabling function
   \(\mathcal{J}\) = activate Bluetooth coupling,
   Activating / deactivating automatic operation
(5) Function LED
   Red = Disabling function active
   Orange = Automatic operation deactivated
   Blue = Bluetooth connection active
   Flashing blue = Bluetooth coupling mode active
   Flashing blue three times = Time is not set
(6) Status LED
   Green = Blind/shutter activated / light switched on
   Red = Error message or reset
Priorities for the LED display:
- Red LED before green or orange LED
- Blue LED before red LED

3 Function

Intended use
- Manual and time-controlled operation of e.g. Venetian blinds, shutters, awnings, lighting or fans
- Operation and programming with mobile end device (smartphone or tablet) via Bluetooth with app
- Operation of switching, dimming or Venetian blind insert or 3-wire extension of System 3000

Product characteristics

Functions directly on the cover
- Operation of blinds/shutters and lighting
- Activating / deactivating the disabling function
- Activating / deactivating automatic operation
- Running time and ventilation position of the blind/shutter can be saved
- Switch-on brightness or switch on to last brightness with dimming insert can be saved
- Night mode

Functions via Bluetooth app
- Operation of blinds/shutters and lighting with status feedback
- Display of current blind/shutter position, dimming position or switching state
- Programming of up to 40 individual switching times
- Venetian blind and slat positions or switching and dimming values can be saved at any switching time
- Possible to copy switching times from other devices
- Switching at sunrise and/or before sunset (Astro function)
- Astro time through position fixing
- Astro time shift can be set for each switching time
- Automatic summer/winter time changeover, can be switched off
- Random function
- Automatic date and time update when connecting with smartphone
- Code request for protection for time programs and configuration possible
- Save a ventilation position, blind/shutter running time, slat change-over time and change-over-time for direction change
- Switch to inverse operation for Venetian blind inserts possible
- Maximum brightness and minimum brightness for dimming insert can be set
- Sun protection and twilight functions are possible via optional brightness sensor

Behaviour after a mains voltage failure

Voltage failure less than power reserve
- All data and settings are preserved
- Missed switching times are not performed later

Voltage failure greater than power reserve
- The blue LED flashes three times repeatedly until the time is automatically updated when connected with the app
- No switching operations are executed
- Switching times are preserved
Default setting
- Switching times on a Venetian blind insert:
  - 07:00, Mo - Thu
  - 21:00, Mo - Thu
  - 07:00, Fr
  - 21:30, Fr
  - 09:00, Sat
  - 21:30, Sat
  - 09:00, Sun
  - 21:00, Sun
- Astro function is deactivated
- Automatic summer/winter time changeover is active
- No switching times are available when operating on a switching/dimming insert

4 Commissioning

Install app on a mobile end device
Requirement for operation via app is a mobile end device with Bluetooth interface, running the Android operating system or iOS.
- Download and install the Gira System 3000 app from the iTunes App Store (iOS) or the Google Play Store (Android).

Couple mobile end devices via Bluetooth
Precondition: The insert must be connected and switched off. The cover is placed on the insert and the mobile end device is close to the cover.
- Activate the coupling mode: Press the $ button (4) for more than 4 seconds. The blue LED flashes slowly. The coupling mode is active for one minute.
- Start the Gira System 3000 app and search for device to be coupled. The "Gira Timer" cover is displayed in the app.
- Perform coupling. The coupling mode is automatically exited after successful coupling. The blue LED lights up to confirm an active connection.
- A maximum of 8 mobile end devices can be coupled with a cover. When coupling the 9th device, the least used device will be deleted.
- To be able to perform position movements of the blind/shutter on a Venetian blind insert, a reference movement is performed in the upper end position after the programming. This reference movement should not be stopped.

5 Operation of Venetian blind and shutters
All settings and operations are also possible via Bluetooth app.

Moving the blind/shutter
- Press the ↑ or ↓ button for longer than one second. The blind/shutter moves in the desired direction to the end position or stops when the button is pressed again.
- If a ventilation position has been saved, the blind stops in the ventilation position when moving down (see Saving the ventilation position).

Adjusting the slats
- Press the ↑ or ↓ button for less than one second.

Saving blind/shutter running time
To perform positioning movements, the blind/shutter running time has to be saved beforehand.
To save blind/shutter running time, the Venetian blind must be moved to the upper end position and the status LED (6) switch off automatically.

- From the top end position, press the \( \downarrow \) button for longer than second. The blind/shutter moves in the lower end position direction.
- Press and hold down the \( \uparrow \) and \( \downarrow \) buttons. The blind/shutter remains stopped, but continues to move after 4 seconds.
- As soon as the blind/shutter has reached the lower end position, release the buttons and press button \( \downarrow \) within the next 4 seconds. The running time is saved. The blind/shutter moves back to the upper end position.

**Saving the ventilation position**

To save the ventilation position, the Venetian blind must be moved to the upper end position and the status LED (6) switch off automatically.

- From the top end position, press the \( \downarrow \) button for longer than second. The blind/shutter moves in the lower end position direction.
- Press and hold down the \( \uparrow \) and \( \downarrow \) buttons. The blind/shutter remains stopped, but continues to move after 4 seconds.
- As soon as the desired ventilation position has been reached, release the buttons and press the \( \uparrow \) button within the next 4 seconds. The ventilation position is saved. The blind/shutter moves back to the upper end position.

If the ventilation position is saved again, the old value is overwritten.

### 6 Operation of lighting

All settings and operations are also possible via Bluetooth app.

**Switching the light**

- Press button \( \uparrow \) or \( \downarrow \) for less than 0.4 seconds.

  With a dimming insert, the light switches to the brightness that was last set or a saved brightness.

**Switch light on with minimum brightness**

- Press the \( \downarrow \) button for longer than 0.4 seconds.

**Adjusting the brightness**

- Press the \( \uparrow \) or \( \downarrow \) button for longer than 0.4 seconds.

**Save switch-on brightness**

- Adjusting the brightness
- Press the \( \uparrow \) and \( \downarrow \) buttons for longer than 4 seconds. Switch-on brightness is saved. For confirmation, the light is switched off briefly and switched on again.

**Delete switch-on brightness**

- Press button (3) briefly: Light switches on at the saved switch-on brightness.
- Press the \( \uparrow \) and \( \downarrow \) buttons for longer than 4 seconds. The switch-on brightness has been deleted. Switching on takes place at the last brightness value set. For confirmation, the light is switched off briefly and switched on again.
7 Activate functions

Activating / deactivating automatic operation
- Press $ button briefly.
  If automatic operation is deactivated, the function LED (5) turns orange. Saved travelling
times are not executed.

Activating / deactivating the disabling function
The disabling function disables extension operation and operation via the app and deactivates
automatic operation. Manual operation using the $ and $ buttons continues to be possible.
- With Venetian blinds, extension operation in the "UP" direction (wind alarm) continuous to be possible.
- Press the $ button for longer than 4 seconds.
  The disabling function is activated or deactivated.
  The function LED (5) turns red if the disabling function is active.

Activating / deactivating night mode
In night mode, the status and function LEDs are not permanently lit, but only for 5 seconds after
a button is pressed.
- Press the $ and $ buttons for longer than 4 seconds.
  Night mode is activated: The function LED turns red for 3 seconds.
  Night mode is deactivated: The function LED turns green for 3 seconds.

Resetting the device to the factory setting
- Press the $ and $ buttons during the first 2 minutes after switching on the mains
  voltage for longer than 20 seconds until the red status LED flashes quickly.
- Release buttons $ and $ and press briefly once again within 10 seconds.
  The red status LED flashes more slowly for approx. 5 seconds.
  The device is reset to default setting (default setting). The blue function LED flashes three
times to indicate that the time is not set.
  On a Venetian blind insert, a reference run to the upper end position is performed.
  After resetting the device to the default setting, it has to be removed from the app.
  On iOS equipment, the device also has to be removed from the list of paired Bluetooth
devices (Settings/Bluetooth). Otherwise, re-pairing will not be possible.

8 Information for electrically skilled persons

DANGER!
Mortal danger of electric shock
Disconnect the device. Cover up live parts.

Fitting the device
Switching, dimming or Venetian blind insert or 3-wire extension are mounted and connected
properly (see instructions of the relevant inserts).
- Fit the cover with frame on the insert.
- Switch on mains voltage.
If the status LED (6) flashes red three times at repeated intervals, the cover was previously con-
ected to another insert. To enable operation again, either place the cover onto the correct in-
sert or press buttons $ and $ for longer than 4 seconds.
This device includes an integrated battery. At the end of its useful life, dispose of the device together with the battery in accordance with the environmental regulations. Do not throw device into household waste. Consult your local authorities about environmentally friendly disposal. According to statutory provisions, the end consumer is obligated to return the device.

9 Technical data

Ambient temperature -5 ... +45 °C
Storage/transport temperature -20 ... +70 °C
Accuracy per month ± 10 s
The time is updated with every connection to the app.
Power reserve approx. 4 h
Radio frequency 2.402 ... 2.480 GHz
Transmission capacity max. 2.5 mW, Class 2
Transmitting range typ. 10 m
Data according to EN 60730-1
Action 1.B.S.T
Degree of soiling 2
Measured surge voltage 4000 V

10 Parameter list

Adjustable parameters via app
Depending on the insert, the following parameters can be changed with the Bluetooth app.

Settings for switching/dimming and Venetian blind inserts

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Setting options</th>
<th>Explanations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shifting the sunrise time</td>
<td>+/- 0 ... 120 minutes</td>
<td>Astro times represent the sunrise and sunset times in the course of a calendar year. If you want the switching to be executed in the early morning at the start of twilight or only at full brightness, this can be realised with this shift.</td>
</tr>
<tr>
<td></td>
<td>Default setting: 0 minutes</td>
<td></td>
</tr>
<tr>
<td>Shifting the sunset time</td>
<td>+/- 0 ... 120 minutes</td>
<td>Astro times represent the sunrise and sunset times in the course of a calendar year. If you want the switching to be executed in the evening at the start of twilight or only at full darkness, this can be realised with this shift.</td>
</tr>
<tr>
<td></td>
<td>Default setting: 0 minutes</td>
<td></td>
</tr>
<tr>
<td>Set the location</td>
<td>Determination of the current position via the GPS function of the mobile end device.</td>
<td>To adapt the Astro times to the geographical location, the GPS function of the mobile end device must be activated. The Astro time is calculated once a week for the localised place.</td>
</tr>
<tr>
<td>Time change</td>
<td>On, Off</td>
<td>Activates automatic summer/wintertime changeover</td>
</tr>
</tbody>

<td>Depending on the insert used Switching, dimming or moving the blind/shutter</td>
<td></td>
<td>The set value is called up when the twilight threshold value is not reached. E.g. the movement to the lower end position (100 %) can be set for Venetian blind inserts.</td>
</tr>
</tbody>
</table>

11 Conformity

Gira Giersiepen GmbH & Co. KG hereby declares that the radio system type art. no. 5367 .. meets the directive 2014/53/EU. You can find the full article number on the device. The complete text of the EU Declaration of Conformity is available under the Internet address: www.gira.de/konformitaet
12 Warranty

The warranty is provided in accordance with statutory requirements via the specialist trade. Please submit or send faulty devices postage paid together with an error description to your responsible salesperson (specialist trade/installation company/electrical specialist trade). They will forward the devices to the Gira Service Center.
