Company
We take responsibility for the future

Family run since 1905
Right from the beginning, Gira and the Giersiepen founding family felt an obligation to actively take responsibility for shaping the future, through thoughts and actions. Sustainable conduct and business practices are the key – to the benefit of the environment, people and the economy. This is true to Gira’s heart and expresses the inner attitude of the company and of its employees. And it is an ongoing task to which everyone at Gira is devoted, each and every day. This pronounced willingness to take responsibility stems from a company culture and values that have developed over the course of 112 years and that count on commitment, predictability, mutual respect and partnership in the company’s interaction with market partners and employees.

Thinking and acting sustainably
This is also the starting point for Gira’s sustainability strategy. The objective of the strategy is to shape all processes and the organisation, so that they fulfill economic, environmental and social priorities – inside and outside of our own factory. Accordingly, Gira invests in the continuous improvement of its environmental footprint and in the responsible handling of resources. And in the development of products and solutions that are particularly environmentally friendly throughout their entire life cycle. Material recycling in plastic production, a range of switches made from natural, environmentally-compatible yet durable materials, fundamental optimisation of energy efficiency of products and buildings, active health management for the employees – Gira has already achieved a lot on the way to reaching the targets that it has set itself.

Future technology “Made in Germany”
Gira’s repeated success on the market with pioneering achievements, innovative solutions and exciting applications is due at least in part to the extraordinary technological know-how and inventive spirit of its employees. More than 130 engineers in a range of disciplines from software specialists to mechanical engineers ensure a high level of innovation in product development and manufacturing. Gira products and solutions stand for the extremely high quality requirements associated with the label “Made in Germany”: German engineering skills and excellent workmanship. Accordingly, Gira products win over users with their high manufacturing quality, their reliability, safety and durability. As well as their timeless aesthetic appeal and elegance.

Award-winning design
From the beginning, Gira has not only attached particular importance to ensuring the highest levels of functionality and reliability for the products, but also invests in giving them pleasing, trend-setting designs. However, Gira does not view having “well-formed” products and solutions as an end in itself. Instead the form is developed from the interaction of design, function, technical innovation and emotion. The numerous prestigious international awards received by Gira products and solutions – such as the “iF Award”, the “Red Dot Award” and the “German Design Award” – are testaments to the exceptional design quality. And the ability to make design and function simply come alive.
**Member of the KNX Association and CEDIA**

As a member of the KNX Association and CEDIA, Gira ensures that its products and solutions meet international standards that are not tied to a particular manufacturer.

**Experiencing Gira live**

In the Gira studios, the interaction of home entertainment and intelligent building technology can be experienced live. Experts such as system integrators and audio specialists use these spaces to present the latest achievements in building technology and multi-media, as well as various interlocking functionalities, in a sophisticated ambiance.

In the other showrooms, there is an application-oriented presentation of Gira products in combination with technology for other fields including plumbing, heating, air conditioning or ventilation applications. The products are also presented integrated in diverse living spaces, for example in upmarket furniture stores.

You can find Gira showrooms in your area here: www.gira.com/showrooms
New switch designs

Beautiful, functional and on the pulse: Gira’s new design lines. Get ready for the classic Gira E2 with a new black matt finish. Also new for those who want to add contrast to premium interior designs: the Gira Studio design line. Combined with the Gira System 55, applications and design versatility are virtually unlimited.
The new surface trend

Black matt.
Black is back! The style for all sophisticated interiors: black matt. Come on-board with today’s latest design.
Gira E2 black matt
A timeless trend.

Irresistible look, surprising feel. The well-established Gira E2 design line has been expanded to now include a new surface: black matt. Accentuate exclusive trends and show contrasts – with its clear lines and elegant design. Ideal for sophisticated interiors, both at home or in business premises. With the broad range of functions from the Gira System 55, Gira E2 in black matt is the perfect match for stylish, versatile and future-proof electrical installation.
Gira E2 touch switch, black matt
The Gira E2 design line in black matt adds style to any room – as touch switch, conventional socket outlet or touch sensor. For full functionality anywhere in the house.

A rounded design.

Round and square, black and white: The new Gira Studio design line focuses on contrasts. As a surface-mounted variant in fashionable design interiors, or as a flush-mounted variant in sophisticated living areas. Combined with inserts from the Gira System 55, a host of modern designs and future-proof installations can be implemented with Gira Studio.
Gira Studio surface-mounted, black glass, touch switch, radio RDS, black matt
Gira Studio
surface-mounted
Design off the line

The design-focused Gira Studio surface-mounted design line is just the ticket for premium installations. It’s suitable as a solitary solution, for example to control lighting. But Gira surface-mounted is also ideal for multiple installations – horizontal or vertical. This lends it the capacity for an endless range of layouts and almost unlimited functionality in the Gira System 55.
Gira Studio surface-mounted, white glass, 2-gang touch switch, pure white glossy
The new design line Gira Studio comes into its own in stylish lofts and other premium design environments. Mounted on brick, render or concrete: its clear lines and striking contrast produce appeal anywhere.

Design concept

Gira Studio flush-mounted, white glass, touch switch, pure white glossy
Gira Studio flush-mounted
One-and-only multiple installation

Gira Studio flush-mounted is just as versatile as Gira’s surface-mounted variant. Single or multiple installation, horizontal or vertical: Gira Studio flush-mounted allows you to create special eye-catchers on a wall or no-frills designs that merge seamlessly with any interior design in form and function.

As a multiple installation, Gira E2 requires installing in EU round boxes.

Gira E2 and Gira Studio

The Gira Design Configurator quickly and easily provides a realistic idea of what the Gira E2 and Gira Studio design lines would look like in a real environment and how it would match your individual interior design style. The Gira Design Configurator’s fascinating ‘live view’ mode uses a smartphone or tablet camera.

The many Gira E2 design options – and, of course, those of the other Gira design lines – can be combined with selected functions from the Gira range in the Gira Design Configurator.

The Gira Design Configurator is available online or as a free app for iOS and Android mobile devices.

The Gira Design Configurator app includes a printable tracking image which can be positioned on the wall.

Using the camera on the mobile end device, the app scans the tracking image and displays the Gira design lines at the desired location in the room.

The “live view” mode allows the product to be viewed from different perspectives.
More about Gira

Intelligent building technology from Gira offers more convenience, greater security, extensive functions, and a high degree of flexibility and mobility. Gira develops and manufactures systems and products that set standards in both technology and design.

Gira and sustainability:
Gira’s mission is to act responsibly and to support the sustainable development of society. For the production of this brochure, we have therefore endeavoured to reduce the consumption of resources and emission of harmful gases and to prevent environmental pollution as much as possible. We strive to reach these goals by using eco-friendly materials. The paper used has been FSC® certified and is made of at least 60% recycled paper.

Please visit the Gira sustainability portal for more information on our current activities and projects:
