Gira – The company

About Gira
Radolfzell-based company Gira Giersiepen GmbH & Co. KG (www.gira.com) is one of the leading full-range suppliers of intelligent system solutions for electrical and networked digital building control. The family-owned company and its many developments have helped to shape the world of electrical systems and building management since it was founded in the summer of 1905. Right from the start, Gira’s many innovations – such as the Gira HomeServer – have made it one of the most influential players in the development of networked smart building systems and in the digitalisation of buildings. Gira products and solutions stand for German engineering expertise, reliable ‘Made in Germany’ quality, sustainable production processes, environmentally friendly and resource-efficient operations and perfection in form and function. But, most importantly, they make people’s lives a little more easy, convenient and secure. It is no coincidence that Gira switches and control, communication and safety systems are now used in some 40 countries, including in Hamburg’s Elbe Philharmonic Hall, the Olympic stadium in Kiev, the Design Museum in London, and the Banyan Tree Hotel in Shanghai. Thanks to its extensive expertise in plastics technology, Gira now also manufactures complex plastic system products for the medical technology sector. The Gira group also includes its subsidiary Stettler Kunststofftechnik in Untersteinach, near Bamberg, and shareholdings in Insta Elektro in Lüdenscheid, the software firm ISE in Oldenburg and the start-up firm Senic in Berlin. Together, around 1,700 employees generate an annual turnover of more than €330 million.

01. Download the Gira Design Configurator app for iOS or Android.

02. Print this page with the tracking image in the original size.

03. Place the selected tracking image in a suitable location in your home.

04. Start the Gira Design Configurator, open the Live View mode and scan the tracking image with your mobile device.

See in advance just how good Gira switches will look on the wall!

An overview of the entire design system: With the Gira Design Configurator, the variety of frame designs in the Gira switch range can be combined in various colours and materials with selected functions just as you wish – now with additional features such as the fascinating “Live View” mode, which shows via your Smartphone or Tablet camera how the selected Gira switches look in the actual environment. The Gira Design Configurator can be called up online or is available as a free app for iOS and Android mobile devices.

Gira and sustainability
Gira is committed to acting responsibly and supporting the sustainable development of society. Therefore, for the production of this brochure, we have aspired to reduce the consumption of resources and emission of harmful gases compared to previous productions while preventing environmental pollution as much as possible. We strive to reach these goals by using ecofriendly materials. For the brochure’s paper, we selected FSC® Mix certified paper. Please visit the Gira sustainability portal for more information on our current activities and projects.
