

The image is a top-down view of various GIRA electrical components on a light-colored, textured surface. In the upper right, a cardboard box is partially open, revealing several white and grey socket outlet modules. In the center, a grey metal mounting plate is shown from the back, revealing the internal wiring terminals and orange safety covers. To its left is a white plastic faceplate with a circular cutout. In the lower right, another grey metal mounting plate is shown from the front, featuring a circular cutout and the GIRA logo. The lighting creates soft shadows, highlighting the textures and shapes of the components.

GIRA

Smart Home.
Smart Building.
Smart Life.

The new
Gira socket outlet generation.

Gira / **Design & function**

We are Gira.
We are the ones with the switches.
But we're so much more.

Future-oriented.
Certified.
Responsible.

We're the guardians, innovators,
Smart Home pioneers, developers,
system experts, KNX partners,
shapers of the future, patent masters,
award winners and designers.

But above all, we are the ones
who listen.
To you.

Subtle, but smart.
With a distinct focus on quality,
materials and functions.
And the driving force of innovation.

In our hearts, we are engineers
on a mission to inspire.
With new technologies,
smart applications and
impressive attention to detail.

We will always work our hardest
to find the best solution for you.
With service, design and performance
made in Germany.

Because that is what we stand for.
And have been standing for since 1905.

Thinking one step ahead – the new Gira socket outlet generation.

New impulses are what motivates us to continue developing and optimising our products in the interest of our partners. This has culminated in the new Gira socket outlet generation. Benefit from faster installation and, at the same time, an even higher level of security due to a series of modifications to the product design.

Discover the new Gira socket outlet generation in the video.

Gira socket outlets embody German engineering expertise – quality “Made in Germany”. They guarantee the highest standards in safety and have been type-certified in accordance with:

VDE 0620-1
NBN C61-112
DS60884-2-D1
NEK 502
Dutch standard T.N.O.

More safety. Faster installation.

Improved safety and increased convenience for easier and faster installation: These two requirements were a primary focus during the development of the new Gira socket outlet generation. The result is a product family that has undergone a full overhaul, and caters precisely to the needs of our specialist partners – with subtle modifications and innovative approaches to solutions.

⊕ Highlights, facts and benefits
of the new generation of Gira socket outlets:

The support ring is earthed in combination with the mounting claws and claw screws and is thereby integrated into this safety measure.

Low installation depth of 29 mm offers more space for cable material.

Quick mountings with 3.5 turns per mounting claw.

Easy installation due to mirror-inverted keyhole profiles.

Backward compatibility allows old and new bases and covers to be combined (except for socket outlets with an earth pin).

Shatter-proof thermoplastic base.

Marking to ensure a centred alignment for multiple installations.

Straightforward claw mounting using high-quality and precise screw head drive.

Expanding claws in the housing to prevent any damage to cable material.

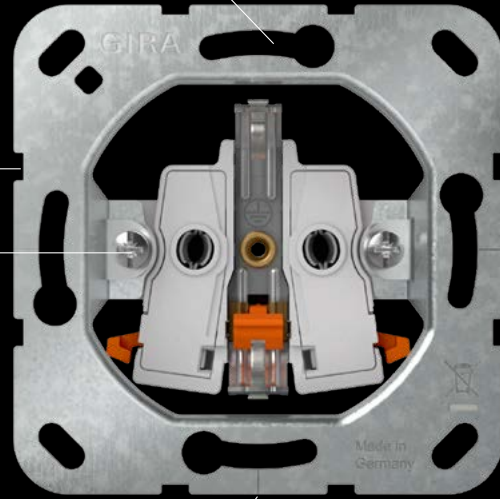

Quality that is “Made in Germany”.

Large keyhole profiles in a patented layout

Leveling aid for multi-gang installation

Claw mounting made easier by robust PZ1/slotted/PH screw head drive

Markings for central alignment with several flush-mounted inserts

Sturdy and corrosion-resistant steel support ring

The base is marked by high-contrast, easy-to-read laser inscriptions

Quick mounting (3.5 turns per mounting claw)

Sturdy earth bar with solid spring fingers

Shatter-proof thermoplastic base

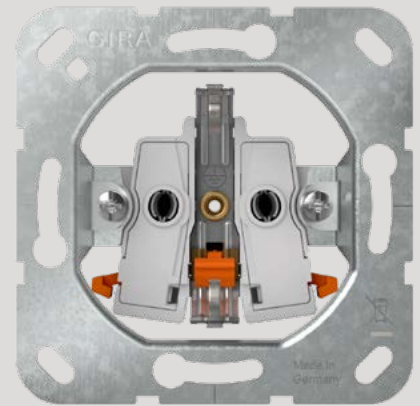

Large, ergonomically shaped release levers

Expanding claws in the housing

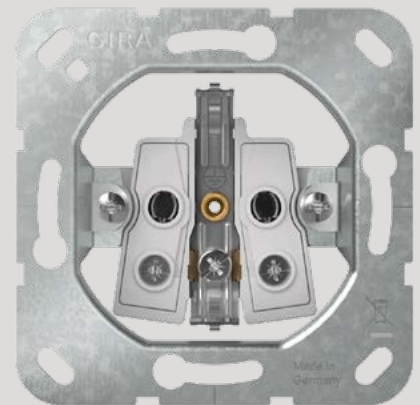

Mounting claws and support ring are earthed

Five variants that share a uniform design.

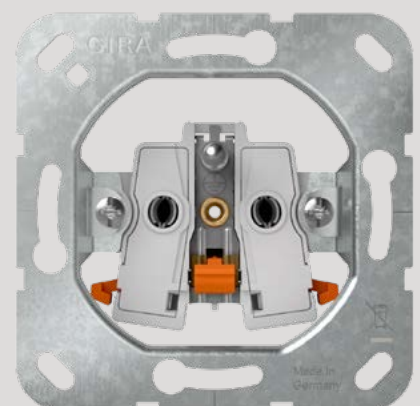

Based on a shared basic design, the new Gira socket outlet generation encompasses five types of socket outlets for flush-mounted, surface-mounted and duct installation. This means that once you've installed one variant, you know how to install all other versions. What's more, installation procedures you've learned and are familiar with remain the same across different versions.

01 SCHUKO socket outlet with plug terminal

02 SCHUKO socket outlet with screw terminal

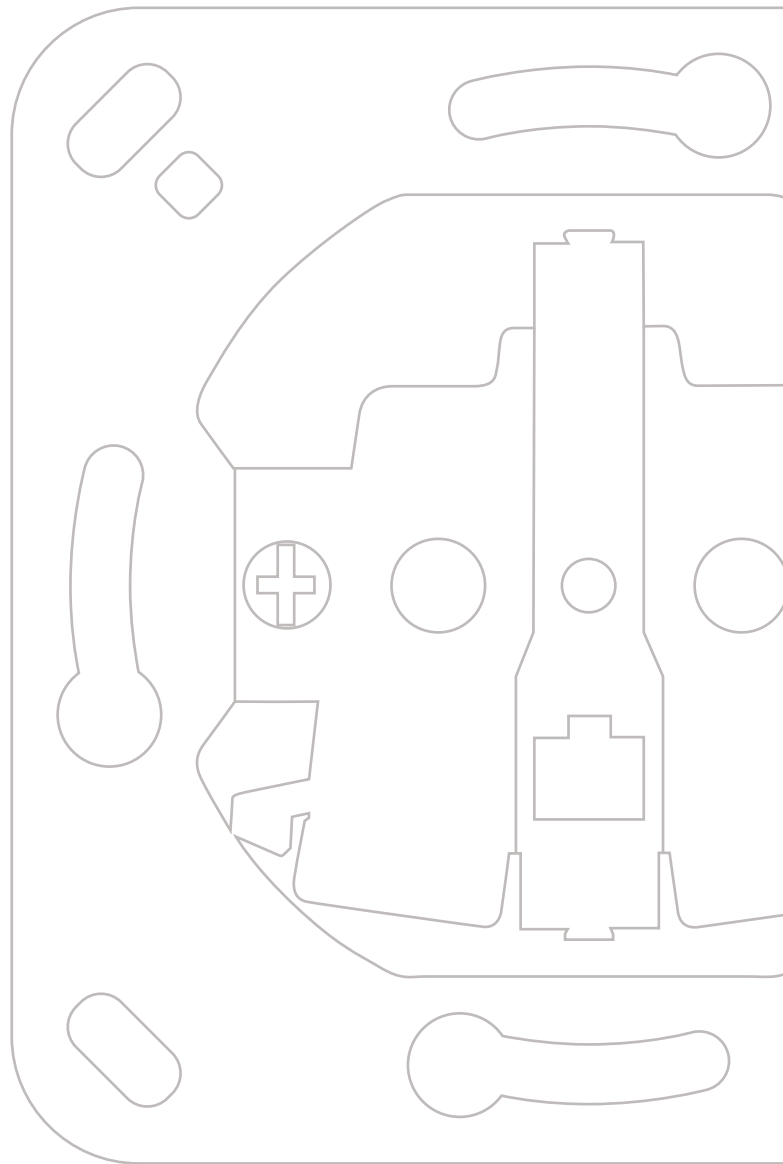

03 Socket outlet with earth pin (CEBEC)
now with plug terminal

04 Socket outlets without a protective contact and with a plug terminal

05 Danish socket outlet with plug terminal

All item numbers at a glance.

To ensure you can profit from the extensive benefits of the new Gira socket outlet generation, we have modified the entire range of socket outlets. Please note the corresponding new item numbers when placing your order.

Being innovative means thinking beyond your own four walls.

Since 1905, we've been the ones with the switches, but we're so much more ... Because innovation is our great passion. Our pioneering spirit drives us to constantly improve and enhance the comfort of people's homes with innovative solutions.

"Made by Diversity".

Gira has been manufacturing products at its location in Radevormwald for more than 100 years. The company is fully committed to the "Made in Germany" quality standard. This is what 1,250 employees from 27 nations work for – each and every one of them with different talents, individual expertise, wide-ranging experiences, and different life stories. This diversity – supported by shared values – provides the basis for our creativity, innovative strength and future viability.

Innovative technology,
award-winning design.

We have always aspired to combine maximum functionality and reliability with a unique design to create special user experiences. The extraordinary design quality and functionality of our products have been recognised by many internationally acclaimed awards.
