

Foreign Certifications for Gira Radio Bus Products

The foreign certifications for the Gira Radio Bus components are based on the following facts.

Rapid, innovative product changes in the field of radio- and telecommunication devices also demand simpler proceedings of certification and launching of the devices on home and foreign markets. While in the past the relevant national certification proceedings had to be observed, in April 2001 they were replaced by a new common European guideline. The guideline R&TTE 1999/5/EG (Radio equipment and Telecommunication Terminal Equipment) in general is based on a test of the device through named independent authorities. If the requirements are met, the devices may be used in all EC- and EFTA-states.

Thus Gira radio products may be operated in the following countries (state 04/2001):

1. Belgium
2. Germany
3. France
4. Italy *
5. Luxembourg
6. The Netherlands
7. Denmark
8. Ireland
9. Great Britain
10. Greece
11. Spain
12. Portugal
13. Austria
14. Finland
15. Sweden
16. Iceland
17. Liechtenstein
18. Switzerland
19. Norway

* A licence must be obtained by the final customer.

Gira strives for radio certifications in further countries.
